

SOLOMON NNAJIEZE

DevOps Engineer | Cloud & Infrastructure Automation

Email: snnajieze@gmail.com | Phone: 08108938172

LinkedIn: <https://www.linkedin.com/in/snnajieze>

PROFESSIONAL SUMMARY

DevOps Engineer with 7+ years of hands-on experience supporting cloud infrastructure, Linux servers, CI/CD workflows, and containerized applications. Strong background in AWS, Docker, Nginx, and automation, with a foundation in PHP/Laravel development that enhances collaboration with engineering teams. Experienced working independently and with distributed teams to deliver reliable, scalable systems.

CORE SKILLS

Cloud & DevOps: AWS (EC2, S3, RDS, IAM, VPC), DigitalOcean, CI/CD, Infrastructure Monitoring

Containers & Web: Docker, Docker Compose, Nginx, Apache

Systems: Linux Administration, Networking (LAN/WLAN, DNS, Firewalls), VPS Management

Automation & Scripting: Git, Bash (basic), REST APIs

Programming: PHP, Laravel, MySQL, Python (basic for automation)

Monitoring & Reliability: Grafana (dashboards, alerts), Logging & Observability

Collaboration: Git-based workflows, Documentation, Remote Collaboration

PROFESSIONAL EXPERIENCE

Full Stack Web Developer / DevOps Support

SwitchCoins Global Ltd. | Feb 2021 – Apr 2022 - Supported cloud-based applications hosted on DigitalOcean and AWS, ensuring availability and performance. - Evaluated, implemented, and maintained server infrastructure for Laravel-based production systems. - Configured and maintained Nginx and Apache web servers on Linux VPS environments. - Collaborated with teams to deploy and manage scalable web applications. - Used Git for version control and coordinated deployments.

Web Developer & DevOps Support

BFA Digital Tech | Jul 2019 – Jan 2021 - Built and deployed backend systems using PHP, MySQL, and REST APIs. - Managed cloud servers on DigitalOcean, including application deployments and maintenance. - Assisted with troubleshooting server and application issues in production environments. - Created and maintained technical documentation for internal use. - Trained 60+ students in web development fundamentals, strengthening communication and documentation skills.

Junior Web Developer & Network Administrator

Vision Data Techs | Aug 2015 – Jun 2019 - Developed web portals for schools and businesses. - Set up and maintained LAN/WLAN networks, routers, and basic firewall configurations. - Supported on-premise systems and assisted with server and network troubleshooting.

PROJECTS

XWhyMobile – Android App for data and airtime purchases
- Built backend services using PHP and MySQL with REST APIs. - Supported deployment and maintenance on cloud infrastructure.

EDUCATION

Higher National Diploma (HND) – Computer Science

Our Saviour Institute of Science, Agriculture and Technology (OSISATECH) | 2017

O-Level Certificate – St. Joseph Comprehensive Secondary School, Agbani | 2012

ADDITIONAL INFORMATION

- Open to fully remote or hybrid roles
 - Strong problem-solving skills and ability to work with minimal supervision
 - Continuous learner with interest in cloud scalability, reliability, and DevOps best practices
